

DEVELOP AND DESIGN MOBILE OR WEB APPLICATION TO CHANGE BACKGROUND COLOUR AND MENUS.

Aim:

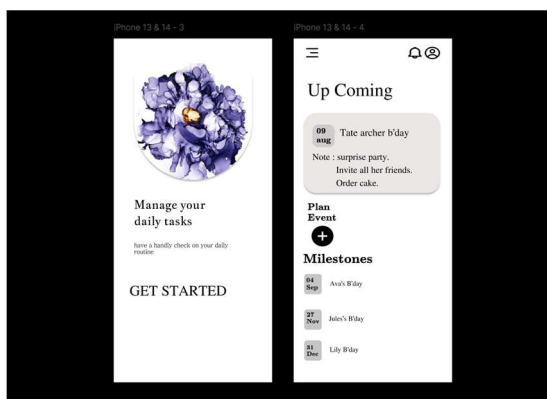

To develop and design mobile or web application to change background colour and menus.

Procedure:

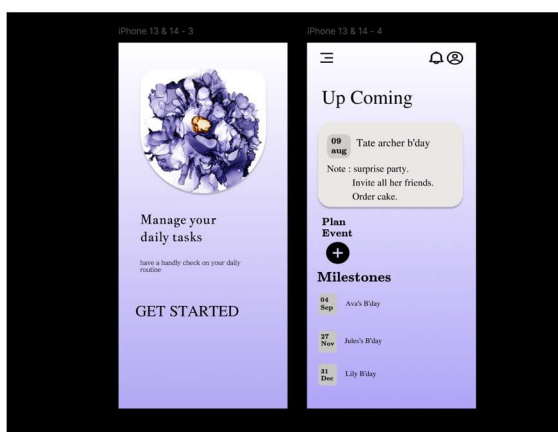

1. Open figma and create a template.
2. Design your own mobile webpage and add a background to it.
3. Adjust your background using the given point tool and rectangle tool.
4. Add more details to your designed web page
5. Save the design in a file or screenshot your work.
6. Change the background image again and screenshot your work.
7. Take both the images, add it to Ms-word to show the difference.
