

NEWS APP

Aim:

To deliver real-time, personalized, and reliable news to users in a simple and intuitive interface

Procedure:

1. App Design

Key Features:

1. Personalized News Feed:
 - Users select interests (e.g., politics, sports, technology).
 - AI curates articles based on preferences.
2. Real-time Updates:
 - Push notifications for breaking news.
 - Live news feeds from trusted sources.
3. Offline Reading:
 - Save articles to read offline.
4. Search and Filters:
 - Search for specific topics or use filters for regions or categories.
5. Multimedia Content:
 - Videos, podcasts, and infographics alongside articles.

2. App Pages

Page 1: Home Screen

- Header: App name/logo, search bar, and settings.
- Sections:
 - Featured News (carousel with top headlines).
 - Personalized Categories (e.g., "Top Picks for You").
- CTA: "View More" button for each section.

Page 2: News Details

- Full article view with text, images, or videos.
- Options: Save, Share, or Like.

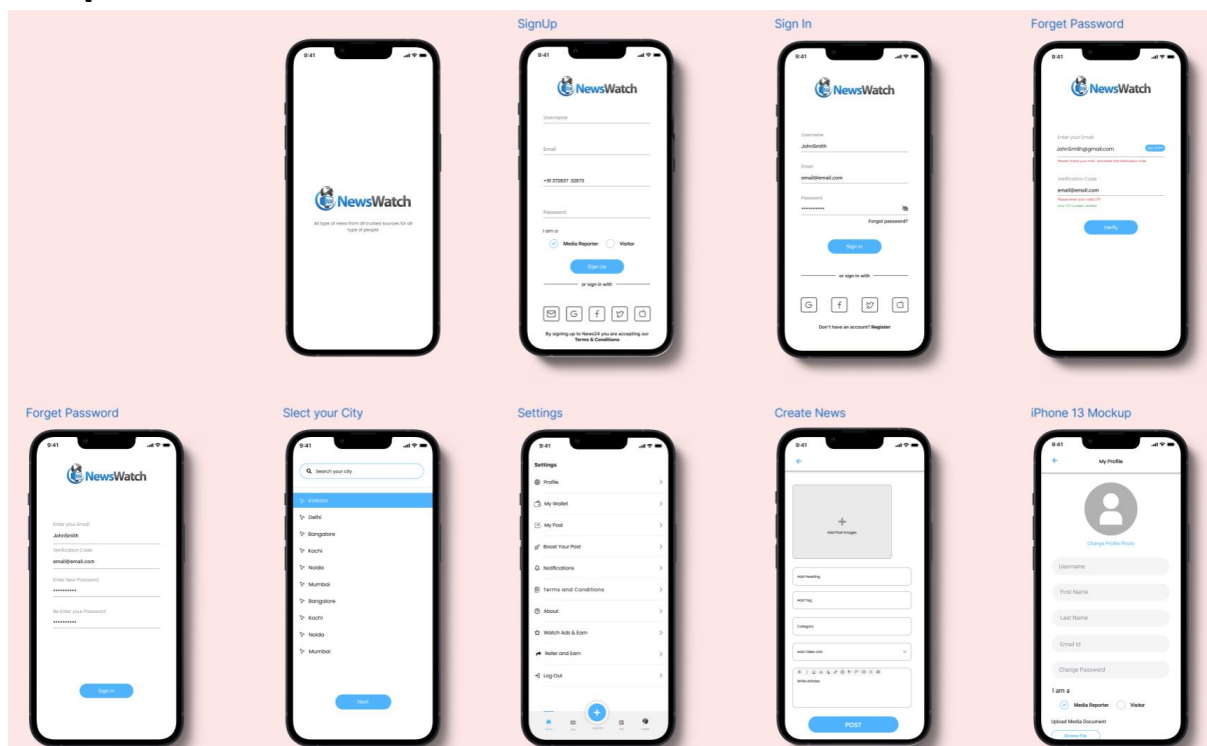

Page 3: Categories

- List of news categories (e.g., Sports, World, Tech, Entertainment).
- Selection Mechanism: Clickable tiles or a dropdown.

Page 4: Profile & Settings

- Features:
 - Manage preferences (categories, regions).
 - Notifications toggle.
 - Dark mode option.

Output:

Result: To deliver real-time, personalized, and reliable news to users in a simple and intuitive interface has designed successfully.
